

# What the Clinicians Say... Insight # 3 of 5

## These Innovative Wound Care Products are being Used...

The 20 Wound Care Specialists that we recently surveyed in Germany & the UK had used &/or evaluated the following Innovative Wound Care Products (IWCP) in the previous 12 months.

Even though the survey sample group was small it is interesting to note the comparative prevalence of single use NPWT devices and the lack of variety in the different types of products being used.

<b>Innovative Wound Care Product Types</b>	Single Use NPWT (13)	Collagen Dressings (6)	Instillation NPWT (4)	Topical Oxygen (4)	Electro Stimulation (3)	Biodermal Substitute (1)	Platelet Derived Dressings (1)	Ultrasound (1)
<b>Product Brand Names Provided</b>	Pico Avelle Prevena	Promogran Kerecis Kytocel Cellutome	VAC - Veraflo KCI - Instillation	Granulox Natrox	Accel-Heal BRH-A2	Strattice	Nanogen	MIST

### Conspicuous by their absence...

Acellular Matrices . Bio-electric . Cold Plasma . Kinetics . Laser . Nitric Oxide  
Photo Therapy . Platelet-Derived Growth Factors . Platelet-Rich Plasma  
Shock-Wave Therapy . Stem Cell . Ultra Sound
